

Question number	Answer	Notes	Marks
7 a	Any FOUR from: MP1. Current in <u>coil</u> ; MP2. (Creates) magnetic field (around the wires of the coil); MP3. Interaction of (this) field with that of (permanent) magnets; MP4. There is a force on the wire(of coil); MP5. Reference to left hand rule; MP6. force up on one side and down on other side;	current in circuit is not enough coil becomes an electromagnet  allow field cutting as the interaction  idea of catapult field  reference to moment/turning effect on the coil	4
b i	one of <ul style="list-style-type: none"> <li>Reverse supply polarity (however described);</li> <li>reverse current direction (however described);</li> <li>swap magnets over(however described);</li> </ul>		1
ii	any one from: <ul style="list-style-type: none"> <li>Reduce current (however described);</li> <li>Reduce voltage (however described);</li> <li>increase resistance of circuit (however described);</li> <li>weaker magnetic field (however described);</li> </ul>	Allow : less turns on coil Condone: fewer coils	1

(Total for Question 7= 6 marks)
