Diagram **NOT**  
accurately drawn

Figure 4

A company manufactures chocolate bars that are inside packaging that is in the shape of a right triangular prism.

The cross section of the prism is an equilateral triangle with sides of length  $x$  cm, as shown in Figure 4.

The volume of the prism is  $72 \text{ cm}^3$

The total surface area of the prism is  $S \text{ cm}^2$

(a) Show that

$$S = \frac{\sqrt{3}x^2}{2} + \frac{288\sqrt{3}}{x} \quad (6)$$

Given that  $x$  can vary,

(b) use calculus to find, to 4 significant figures, the value of  $x$  for which  $S$  is a minimum, justifying that this value gives a minimum value of  $S$ .

(5)

(c) Find, to 3 significant figures, the minimum value of  $S$ .

(2)
