

- 5** A toy produces continuous waves when floating on the surface of a pool of water.
The waves spread out as circular wavefronts.

Diagram 1 shows the wavefronts produced when the toy is not moving, as viewed from above.

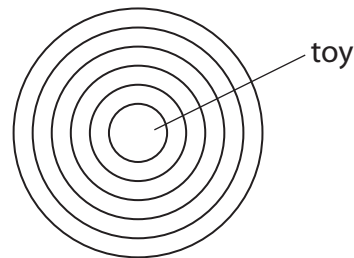

Diagram 1

Diagram 2 shows the wavefronts produced when the toy is moving across the surface of the pool of water.

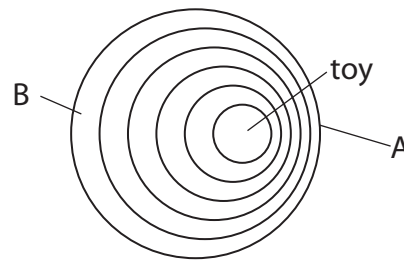

Diagram 2

- (a) Draw an arrow on diagram 2 to show the direction the toy is moving.
