

Mark Scheme (Results)

Summer 2017

**Pearson Edexcel International GCSE
in Physics (4PH0) Paper 2P**

**Pearson Edexcel Level 1/Level 2 Certificate
in Physics (KPH0) Paper 2P**

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Question number	Answer	Notes	Marks
1 (a)	<p>B – mass;</p> <p>The only correct answer is B</p> <p>A is not correct because it's a vector</p> <p>C is not correct because it's a vector</p> <p>D is not correct because it's a vector</p>		1
(b)	<p>A – acceleration;</p> <p>The only correct answer is A</p> <p>B is not correct because it's a scalar</p> <p>C is not correct because it's a scalar</p> <p>D is not correct because it's a scalar</p>		1
(c)	<p>B;</p> <p>The only correct answer is B</p> <p>A is not correct because the ball would be accelerating as it falls</p> <p>C is not correct because the ball would be accelerating as it falls</p> <p>D is not correct because the ball would be falling at a constant velocity</p>		1

Total for question 1 = 3 marks

Question number	Answer	Notes	Marks
2 (a) (i)	<p>MP1. single circle centred on the wire and parallel to the plane of the card;</p> <p>MP2. at least two concentric circles;</p> <p>MP3. anti-clockwise direction arrow marked on at least one line;</p> <p>e.g.</p> 	<p>allow gap where circle crosses wire</p> <p>circles do not have to stay within the card</p> <p>DOP</p> <p>ignore spacing</p> <p>reject if contradicting arrows</p>	3
(ii)	<p>EITHER:</p> <p>MP1. iron filings used;</p> <p>MP2. tap card / eq.;</p> <p>OR</p> <p>MP1. (plotting) compass used;</p> <p>MP2. multiple compasses used / compass moved to new position;</p> <p>OR</p> <p>MP1. use of a magnet / another current-carrying conductor;</p> <p>MP2. to produce a force / movement;</p>	<p>ignore references to magnets, other current-carrying wires being used</p> <p>allow iron powder, steel dust etc.</p> <p>allow use of a magnetometer</p>	2

(b)	(i)	3
	(ii)	2

Statements	Order
the switch is closed	1
the lamp is on	(6)
the armature is attracted	3
the contacts are pushed together	5
the electromagnet is magnetised	2
the armature rotates	4

all five numbers in correct positions = 3 marks;;;
 three-four numbers in correct positions = 2 marks only;;
 one-two numbers in correct positions = 1 mark only;

idea that electromagnet loses its magnetism;

AND 1 of;

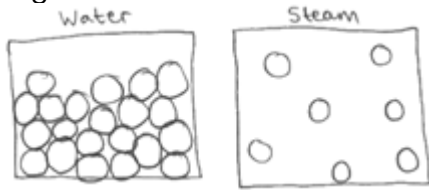

- armature no longer attracted / idea that armature moves away from the magnet
- opens the contacts / breaks the **lamp** circuit

condone idea that electromagnet is not magnetic

allow iron for armature

ignore references to current not flowing

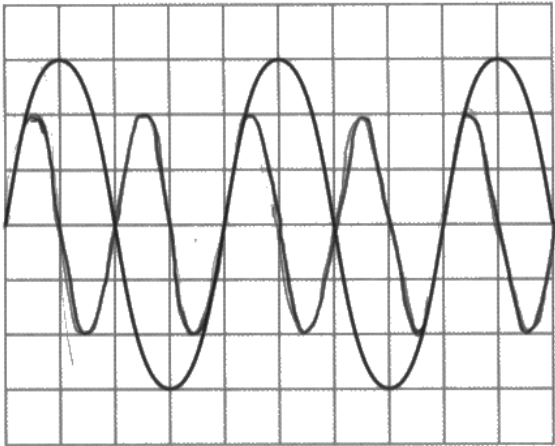

Total for question 2 = 10 marks

Question number	Answer	Notes	Marks
3 (a)	any 2 of: MP1. particles gain kinetic energy / KE; MP2. particles move further apart; MP3. some particles escape / evaporate from the surface / become a gas/vapour;	allow particles move faster / vibrate more allow particles break bonds	2
(b)	comment about separation; e.g. particles in steam further apart comment about location of particles; e.g. steam particles fill container but water particles have a surface e.g.  = 2 marks	ignore comments referring to motion of particles allow steam takes volume of container but water doesn't allow marks if seen on a labelled diagram or writing	2
(c)	any 3 of: MP1. (average) speed / KE of particles decreases (when cooled); MP2. particles collide less often with the can; MP3. (when cooled) pressure inside the can decreases; MP4. pressure outside greater than pressure inside the can;	allow molecules for particles throughout allow 'particles join water' / steam condenses (into water) allow particles collide with the can with less force allow pressure proportional to temperature ignore references to vacuum allow RA	3

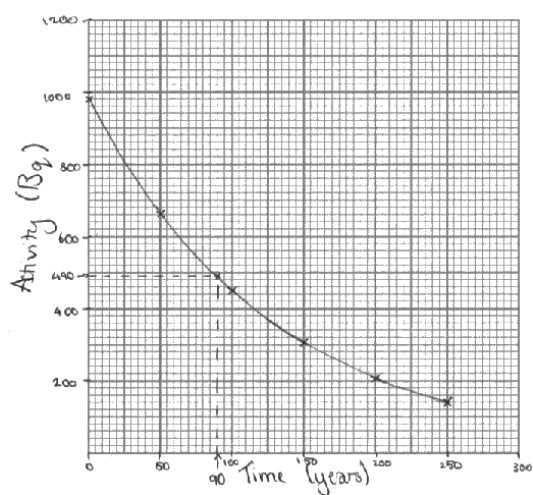

Total for question 3 = 7 marks

Question number	Answer	Notes	Marks										
4 (a)	<p>one mark for each correct tick;; if three ticks, 1 mark maximum if four ticks, zero marks</p> <table><tr><th>Statement</th><th>Tick</th></tr><tr><td>negatively charged particles move from the cloth onto the balloon</td><td>✓</td></tr><tr><td>positively charged particles are rubbed off the balloon</td><td></td></tr><tr><td>negatively charged particles on the balloon are protons</td><td></td></tr><tr><td>the cloth becomes positively charged</td><td>✓</td></tr></table>	Statement	Tick	negatively charged particles move from the cloth onto the balloon	✓	positively charged particles are rubbed off the balloon		negatively charged particles on the balloon are protons		the cloth becomes positively charged	✓		2
Statement	Tick												
negatively charged particles move from the cloth onto the balloon	✓												
positively charged particles are rubbed off the balloon													
negatively charged particles on the balloon are protons													
the cloth becomes positively charged	✓												
(b) (i)	any 1 of: (possibility of a) spark; (possibility of an) explosion / fire / eq;	ignore references to shock allow 'ignite the petrol'	1										
(ii)	earthing / grounding the { tank / pipe };	allow hose for pipe allow can for tank allow description of earthing e.g. 'connecting tank/pipe to ground (with a wire)'	1										
(c)	(granules) repel; (because) charge on the granules is all the same / eq;	ignore references to attraction to container	2										

Total for question 4 = 6 marks

Question number	Answer	Notes	Marks
5 (a)	20 (Hz) to 20 000 (Hz);;	one mark for each end of the range correct allow 20 kHz for 20 000 Hz	2
(b) (i)	microphone;		1
(ii)	any 3 of: MP1. adjust the oscilloscope to get a steady trace / eq; MP2. adjust time base / oscilloscope to give a minimum of 1 complete cycle (on the screen); MP3. measure number of squares for a number of complete cycles / waves; MP4. multiply number of squares by the time base / eq. (to find T); MP5. use $f = 1/T$;	ignore references to wavelength, amplitude, finding number of waves passing a point allow 'measure/find the time period / time for one wave' if neither MP3 or MP4 scored	3
(iii)	amplitude smaller throughout; <u>double</u> the original frequency throughout; 	ignore vertical position of waveform	2

Total for question 5 = 8 marks

Question number	Answer	Notes	Marks														
6 (a) (i)	suitable linear scale chosen (>50% of grid used); axes labelled with quantities and units; plotting correct to nearest half square;;	orientation needs to be correct -1 for each mistake to a maximum of -2	4														
(ii)	line (curve) of best fit acceptable;  <table data-bbox="317 1039 836 1128"><tr><td>Time in years</td><td>0</td><td>50</td><td>100</td><td>150</td><td>200</td><td>250</td></tr><tr><td>Activity in Bq</td><td>980</td><td>660</td><td>450</td><td>305</td><td>205</td><td>140</td></tr></table>	Time in years	0	50	100	150	200	250	Activity in Bq	980	660	450	305	205	140	allow ECF from plotting i.e. smooth curve with points evenly distributed about it	1
Time in years	0	50	100	150	200	250											
Activity in Bq	980	660	450	305	205	140											
(iii)	appropriate working shown on graph or numerically; 90 years;	allow ECF from graph answer within range of 85-95 (years) gets 2 marks	2														
(b) (i)	(0.56 X 2.7 =) 1.5 (W);	allow 1.51, 1.512	1														
(ii)	idea that alpha has short range / low penetrating power; and 1 of; <ul style="list-style-type: none">alpha absorbed by the casealpha does not reach the skin	ignore 'alpha is weak' ignore 'alpha can't penetrate paper' allow 'cannot penetrate the case' allow 'cannot penetrate the skin'	2														
(c)	longer half-life means plutonium decays more slowly; idea that it generates electricity / power for longer;	accept RA allow idea that energy does not 'run out'	2														

Total for question 6 = 12 marks

Question number	Answer	Notes	Marks
7 (a) (i)	momentum = mass x velocity;	in words or accepted symbols e.g. $p = m \times v$	1
(ii)	substitution; evaluation; unit; e.g. ($p =$) $0.000\,035 \times 8.8$ ($p =$) 0.00031 kg m/s	-1 for power of ten (POT) error kg m/s or Ns 3.08×10^{-4} , 0.000308 Ns allow 0.308 g m/s for 3 marks	3
(b) (i)	gravitational (potential) energy = mass x g x height;	allow in standard symbols or in words e.g. $GPE = m \times g \times h$ reject 'gravity' for g	1
(ii)	substitution; evaluation; e.g. ($GPE =$) $0.000\,035 \times 10 \times 1200$ ($GPE =$) 0.42 (J)	allow use of $g=9.8 / 9.81$ 420 (J) gets 1 mark max. allow 0.4116 , 0.41202	2
(iii)	same answer as (b)(ii);	allow 0.42 (J)	1
(c) (i)	$KE = \frac{1}{2} \times m \times v^2$;	allow in accepted symbols or words	1
(ii)	substitution; rearrangement; evaluation; e.g. $0.42 = \frac{0.000\,035 \times v^2}{2}$ $v^2 = 24000$ ($v =$) 155 (m/s)	ECF from (b)(iii) answer must be seen to at least 3 s.f. award 2 marks max. for reverse calculation of $KE = 0.394$ (J) $154.919...$	3
(iii)	any 2 of: MP1. (raindrop reaches) terminal velocity; MP2. drag / air resistance / friction acts; MP3. energy lost to surroundings / eq.; MP4. (resultant) downwards force is less;	ignore unqualified "it loses energy" allow 'acceleration is less'	2

Total for question 7 = 14 marks
