

5 The graph of the straight line with equation $3x + y = 11$ is drawn on the grid opposite for $0 \leq x \leq 4$

- (a) (i) On the grid, draw the graph of the straight line with equation $4x = 3 + 2y$ for $0 \leq x \leq 4$

(3)

- (ii) Use your graphs to find estimates, to one decimal place, of the value of x and the value of y that satisfy the simultaneous equations

$$\begin{aligned}3x + y &= 11 \\4x &= 3 + 2y\end{aligned}$$

(1)

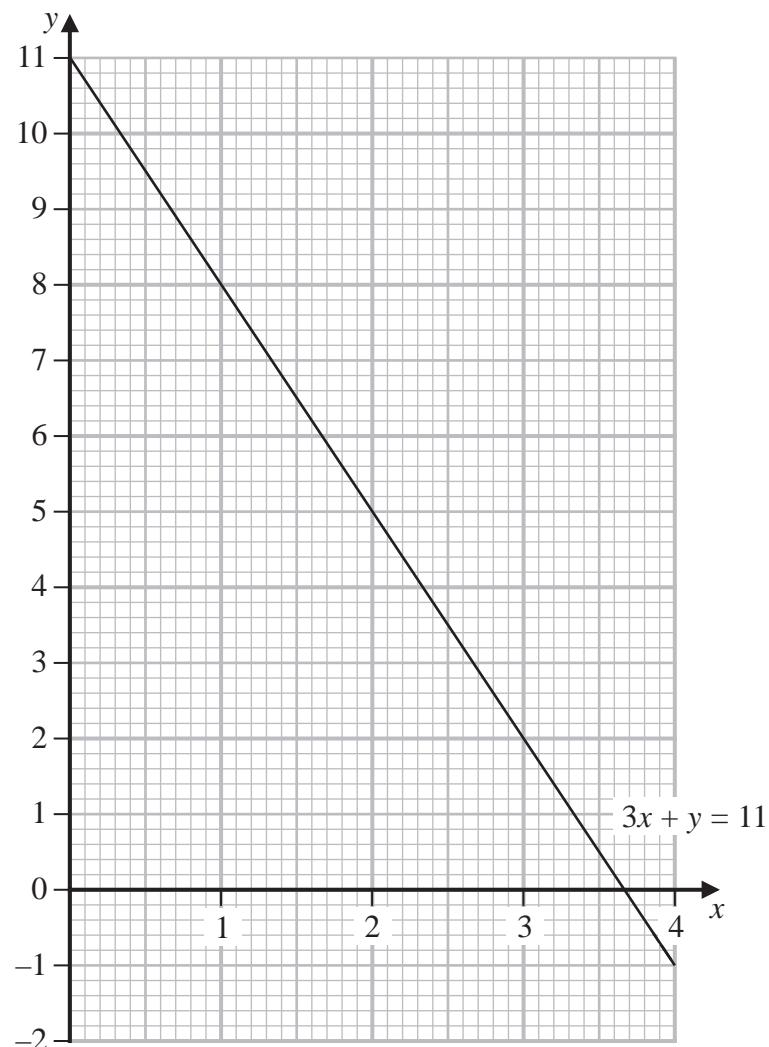

- (b) Solve the simultaneous equations

$$\begin{aligned}4x + xy - x^2 &= -10 \\3y + x &= 7\end{aligned}$$

Show clear algebraic working.
