23 In a region of a country, two types of eagle, type A and type B, can be found.

In 2003 the ratio of the number of type A eagles to the number of type B eagles was 2:5
In 2015 the ratio of the number of type A eagles to the number of type B eagles was 4:3

From 2003 to 2015, the number of type A eagles had increased by 16
From 2003 to 2015, the number of type B eagles had decreased by 107

Calculate the number of type B eagles in this region in 2015

(Total for Question 23 is 5 marks)
