**8** (a) Describe how two magnets can be arranged to produce a uniform magnetic field. You may draw a diagram to support your answer.

(2)

(b) The diagram shows a wire in a uniform magnetic field.

(i) The wire is moved up and down repeatedly in the magnetic field.

Explain the effect that this movement has on the ammeter reading.

(3)

DO NOT WRITE IN THIS AREA

(ii) Explain the effects on the ammeter reading of moving the wire with the same amplitude but at a higher frequency.	
	(4)
(Total for Question 8 = 9 marks)
