| 2 Solve the equations |                                   |
|-----------------------|-----------------------------------|
| $y = x^2 - 6x + 5$    |                                   |
| y + x = 11            |                                   |
|                       | (5)                               |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       |                                   |
|                       | (T. 1.16. O                       |
|                       | (Total for Question 2 is 5 marks) |
