Question number		Answer	Notes	Marks
5 (a)		20 (Hz) to 20 000 (Hz);;	one mark for each end of the range correct allow 20 kHz for 20 000 Hz	2
(b)	(i)	microphone;		1
	(ii)	<ul> <li>any 3 of:</li> <li>MP1. adjust the oscilloscope to get a steady trace / eq;</li> <li>MP2. adjust time base / oscilloscope to give a minimum of 1 complete cycle (on the screen);</li> <li>MP3. measure number of squares for a number of complete cycles / waves;</li> <li>MP4. multiply number of squares by the time base / eq. (to find T);</li> </ul>	ignore references to wavelength, amplitude, finding number of waves passing a point  allow 'measure/find the time period / time for one wave' if neither MP3 or MP4 scored	3
	(iii)	MP5. use f = 1/T; amplitude smaller throughout;	ignore vertical position of waveform	2
		double the original frequency throughout;		

Total for question 5 = 8 marks
